### PLANT A WINTER LAWN  
AND BEAUTIFY YOUR HOME SURROUNDINGS

Level the ground carefully, pulverizing all lumps and removing all stones. Enrich with Gromore Fertilizer at the rate of one pound to 20x20 feet and rake it in. Scatter the seed evenly over the surface at the rate of two pounds to 10x10 feet for Australian Rye, one pound to 10x20 for Blue Grass and one pound to 500 square feet for Bermuda Grass; then apply a mulch of sand or well-rotted fine manure. Water carefully and regularly, not allowing the surface to dry out until the grass is up. In the Salt River Valley and similar climates, Australian Rye Grass should be planted from September 15 to March 1 and Bermuda Grass during the Summer months.

Our Annual Catalog and Garden Guide  
**COMES OUT**  
**January 15th**

If interested, send us your name and address.

**TERMS OF SALE**—We do not send perishable Bulbs or Seeds C. O. D. unless twenty-five per cent accompanies order. Bulbs and Seeds sent postpaid to the First, Second, Third and Fourth Zones unless otherwise specified.

**NON-WARRANTY**—The Arizona Seed & Floral Company gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs, plants or trees they send out, and they will not be responsible in any way for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.
BULBS—IMPORTED of Highest Quality for Fall and Winter Planting

GENERAL PLANTING INSTRUCTIONS FOR BULBS—Among many, it is the impression, Bulbs are difficult to grow, but in reality, no other plants are so easy to manage with success and pleasure under all conditions. Bone meal provides better than different classes of bulbs. Sufficient Bulb-grit, or a mixture of fine, loose soil and deep planting: always add barrow manure to your soil, and if a heavy soil, add some sand with the manure. For outdoor planting it is good practice to plant Bulbs to a depth of two to six times the size of the bulb. Bulbs should not be planted as deep as in light sandy soil. Planting in pots, deep planting is unnecessary, one-half inch to one inch for large Bulbs is deep enough below the surface. Where Bulbs planted in beds are flooded, a light mulch such as straw or well-rotted manure will keep the surface from crustling.

HYACINTH CULTURE: For Winter and Spring blooms out of doors, the bulbs should be planted fifty per cent or deep enough below the surface of the soil. The deepest planting is required in light sandy soil. Plant early in the Fall and secure into the ground a good supply of well-rotted manure. FOR POT CULTURE: Prepare the pots so that they will drain well and use the heat soil possible. Plant the bulbs about one inch below the surface, water thoroughly and put away in a dark cellar or bury them, pot and all, about 6 inches below the surface in the garden. Let them stand about six to eight weeks and then bring them to the light a few times and continue blooming throughout the season. During the growth in the house they should be well watered and kept near the light but direct sunlight should be avoided. HYACINTHS IN GLASSES: A very interesting way to grow Hyacinth bulbs is in a Hyacinth glass made especially for that purpose. Fill the glass with clean water so that the water will reach the bulb. Place the glass and bulb in a dark cellar or closet until the roots have made considerable growth, being careful in the meantime to keep the glass filled with water. This will force the bulbs to bloom in a cool, light place. A little charcoal added to the water will keep it cool and sweet.

EXHIBITION HYACINTHS
GIANT—Pink Bells
YELLOW HAMMERS—Single Yellow and Orange Yellow.
QUEEN OF THE PINKS—Large White
KING OF THE BASES—Single Light and Dark Blue
GERTRUDE—Dark Pink. Most popular bedding Hyacinth.
LA VICTORIE—Fine Red, forces early; extra fine.
QUEEN OF THE PINKS—Lovely Pink
VICTORY—Earliest forcing variety; large truss.
QUEEN OF THE BASES—Fine Light Blue; beautiful silvery shades.

AMARYLLIS
BELLA DONNA—“Bella Donna Lily,” shaded with pink or orange, blooms from eight to twelve weeks, or until the green shoots have attained a height of five or six inches; then bring the dish to the light and look for the pretty blooms in a few weeks. lovers for cutting. Soak the roots for two hours with clean water so that the water will touch the base of the bulbs, place the water and bulbs in a dark cellar or closet until the roots have made considerable growth, being careful in the meantime to keep the glass filled with water.

Crocus ZONATUS
(Colchicum) FALL FLOWERING CROCUS
Blooms without soil indoors. Special. Color, light lilac, orange-yellow in center. Put the bulbs in a little pot or saucer filled with dry sand. They will flower superfluously in a few weeks, without need of any water. The bulbs also produce good flowers by putting them on the glass and bulb in a dark cellar or closet until the roots have made considerable growth, being careful in the meantime to keep the glass filled with water.

FOR POT CULTURE: Prepare the pots so that they will drain well and use the heat soil possible. Plant the bulbs about one inch below the surface, water thoroughly and put away in a dark cellar or bury them, pot and all, about 6 inches below the surface in the garden. Let them stand about six to eight weeks and then bring them to the light a few times and continue blooming throughout the season. During the growth in the house they should be well watered and kept near the light but direct sunlight should be avoided. HYACINTHS IN GLASSES: A very interesting way to grow Hyacinth bulbs is in a Hyacinth glass made especially for that purpose. Fill the glass with clean water so that the water will reach the bulb. Place the glass and bulb in a dark cellar or closet until the roots have made considerable growth, being careful in the meantime to keep the glass filled with water. This will force the bulbs to bloom in a cool, light place. A little charcoal added to the water will keep it cool and sweet.

CROCUS
WHITE CALLA: Medium Size Bulb—Each, 5c; 50c per dozen; $3.00 for $100.
LAVENDER PINK: Large Size, 90c dozen; per 100, for $6.00.
CARRERA: Large Pink—10c each; 75c per dozen; $6.00 per 100.
PURITY—White—5c each; 50c per dozen.

RANUNCULUS
GIANT FRENCH
The Giant French Ranunculus is a semi-double variety but cultivated in this fashion contains many which are almost real doubles. The Giant French are the most vigorous growers, producing an abundance of bloom for about two months. Lovely Pink, late; most Spring flowers for cutting. Soak the roots for two hours and plant the claws downward. Plant six to eight inches apart and cover to a depth of 1 inch. GIAN FRENCH MIXED—Each, 10c; Large size, 90c dozen; per 100, for $5.00.

CHINESE SACRED LILY
Flowers white, with golden cup; fragrant and grows in clusters. American grown bulbs. Plant bulbs one to two inches apart and cover to depth of about two inches. Instead of keeping at room temperature, keep them in a cool place, in rather cool temperature; failure will result if kept too warm.

GENERAL PERSHING—Lavender Pink. CALIFORNIA—Golden Yellow.
CARRERA—Giant Pink—10c each; 75c per dozen; $6.00 per 100.

FREESIAS
Plant bulbs one to two inches apart and cover to depth of about two inches. Instead of keeping at room temperature, keep them in a cool place, in rather cool temperature; failure will result if kept too warm.

Daffodils
Plant two or three bulbs in a 3-inch pot and leave 2 to 8 inches between bulbs, in good soil, in a cool dark place until sprouts attain a height of two or three inches.

FREE FLOWERS
Plant bulbs one to two inches apart and cover to depth of about two inches. Instead of keeping at room temperature, keep them in a cool place, in rather cool temperature; failure will result if kept too warm.
GLADIOLUS BULBS

Gladiolus should be planted about three inches deep in good soil, preferably in a sunny location.

Mixed—Very Best

Be sure and get prices in 100 lots.

IXIAS Small Glads

Plant three inches apart and two inches deep in any garden soil that is in good condition.

FINEST MIXED—Each, 10 cts.; doz., 75 cts.

JONQUILS

For pot culture plant about six in a 5-inch bulb pan and 12 in a 7-inch bulb pan. Use good soil with plenty of drainage, water well and vent the surface crusting. After the peas are up eight or ten inches begin to draw the dirt to vent the surface crusting. Frequent cultivation is very necessary.

For use in flower borders where the bulbs are not apt to be disturbed. Plant early in the Fall to a depth of about 6 inches. Culture well by watering about one inch deep under the surface of the soil and bury out of doors or put in cool Cellar until the lovely Tiger Lily bearing handsome orange-salmon flowers spotted black. It is a good pot or garden variety, a free bloomer, and grows very tall. 25c each; $2.50 per dozen.

LILIUM TIGRINUM SPLENDENS—This is the lovely Tiger Lily bearing handsome orange-salmon flowers spotted black. It is a good pot or garden variety, a free bloomer, and grows very tall. 25c each; $2.50 per dozen.

OXALIS

The most satisfactory way of growing all Spring bulbs, for house and table decoration. It is better than soil for bulbs and plants for indoor pots - use in bowls, jardinières, fern dishes, etc., without drainage.

OXALIS—Small Glads

SWEET PEAS AND HOW TO GROW THEM

Select your space in the open, where the vines may be trained on a trellis, and dig a trench about two feet wide and 18 inches deep. Put about three inches of well-rotted barnyard manure in the bottom of the trench, mix a sprinkle of manure and commercial fertilizer with the dirt that has been removed and replace it. Open a trench across bed about six inches deep and plant one row through which to water them the rest of the season. Frequent cultivation is very necessary and after the peas are 12 to 15 inches high a mulch of fine manure should be applied to the entire bed and grass set into the soil. Keep them well watered and at booming time they should be cut each day to insure a long blooming period.

CANDIDUM or WHITE MADONNA LILY

This is a very hardy Lily for Fall planting. It thrives in most any soil but of course a good soil is preferable. They are excellent in beds or borders where the bulbs are not apt to be disturbed. Plant early in the Fall to a depth of about 6 inches. Culture well by watering about one inch deep under the surface of the soil and bury out of doors or put in cool Cellar until sprouts attain a height of 2 or 3 inches.
